CSCW 2023

Content-based media bias rating

AllSides Media Bias Chart™

Ratings based on online, U.S. political content only – not TV, print, or radio.
Ratings do not reflect accuracy or credibility; they reflect perspective only.

Ratings based on online, US political content only

Selective exposure

(Hart et al. 2009;
Sunstein 2018)

Cross-partisan communication

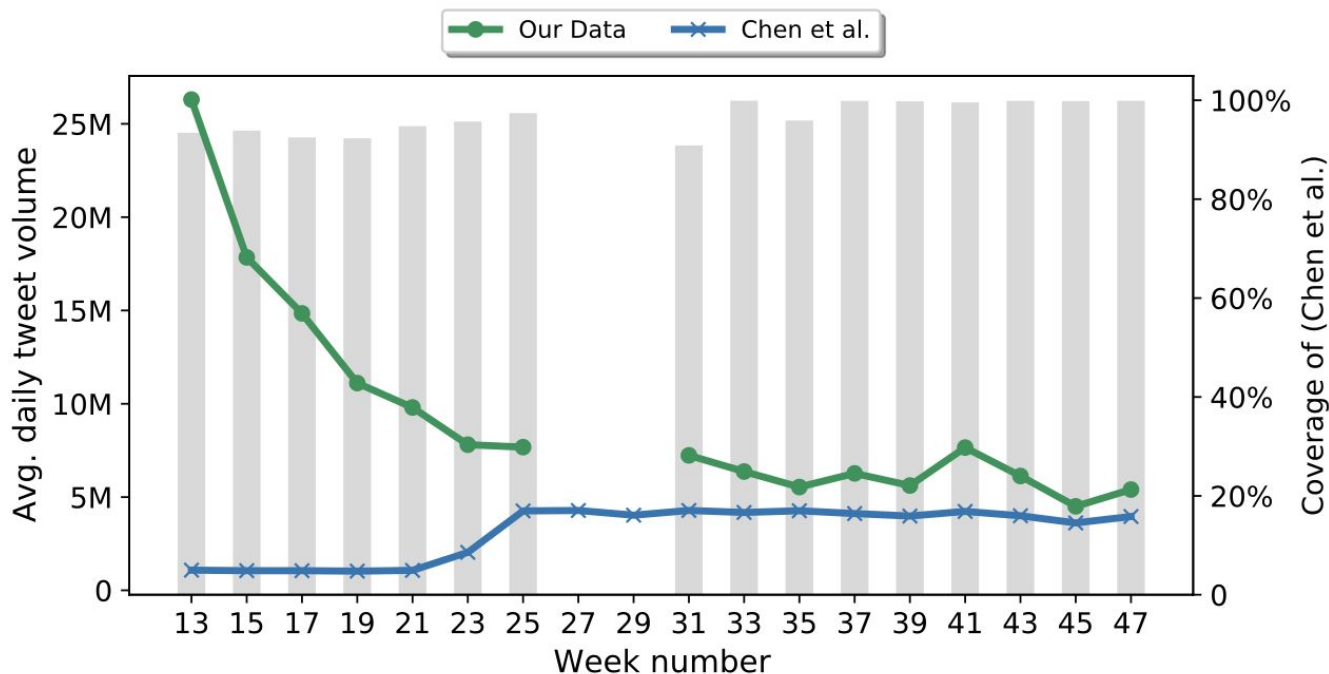

(An et al. 2019; Wu
and Resnick 2021)

1. Motivation and research questions
2. **A new COVID-19 dataset and data processing**
3. **Results**

- An almost complete Twitter stream by tracking a large set of COVID-19 keywords
- 1 billion COVID-19 tweets; 62M Twitter users from 2020-03 to 2020-11

Step 1: Identifying geolocated Twitter users

- (1) Geotagged tweets; (2) Self-reported locations
- 93% accuracy in the validation set
- Ambiguous users are removed, 21M users with one unique location

- Political party, political position, and party members from Wikipedia
- Label propagation on the within-country retweet network involving local politicians
- 93% agreement in the validation set
- 8 countries with 40+% politicians active on Twitter

	#politicians	#w/ Twitter accounts	%coverage	size of retweet network	%coverage of geo. users
United States	609	593	97.4%	946,436	14.3%
United Kingdom	1,456	636	43.7%	98,061	8.7%
Canada	454	192	42.3%	40,103	6.7%
Australia	235	176	74.9%	23,838	8.7%
Spain	635	530	83.5%	46,122	11.4%
France	943	550	58.3%	40,576	6.1%
Germany	752	574	76.3%	14,508	8.1%
Turkey	681	476	69.9%	27,809	4.1%

1. Motivation and research questions
2. A new COVID-19 dataset and data processing
3. **Results**

- URL sharing as a proxy of news consumption
- Audience reach: # unique Twitter users sharing URLs from a domain

- Bridging users: user from country A \rightarrow user from country B

	United States	United Kingdom	Canada	Australia	Spain	France	Germany	Turkey
United States	940,154	2,797	3,924	2,086	755	1,076	1,306	370
United Kingdom	2,150	95,558	561	503	451	544	429	125
Canada	1,020	252	38,954	147	61	109	91	26
Australia	531	236	160	23,186	40	76	82	33
Spain	438	202	90	105	45,561	170	148	10
France	354	118	240	46	128	40,026	139	31
Germany	285	106	68	44	73	90	14,157	67
Turkey	173	68	44	55	0	115	154	27,504

- Bridging users: user from country A \rightarrow user from country B
- Cross-country retweets do not cross the partisan line

- Average of leaning scores for all users who had retweeted a media
- Strongly correlated with existing media bias ratings

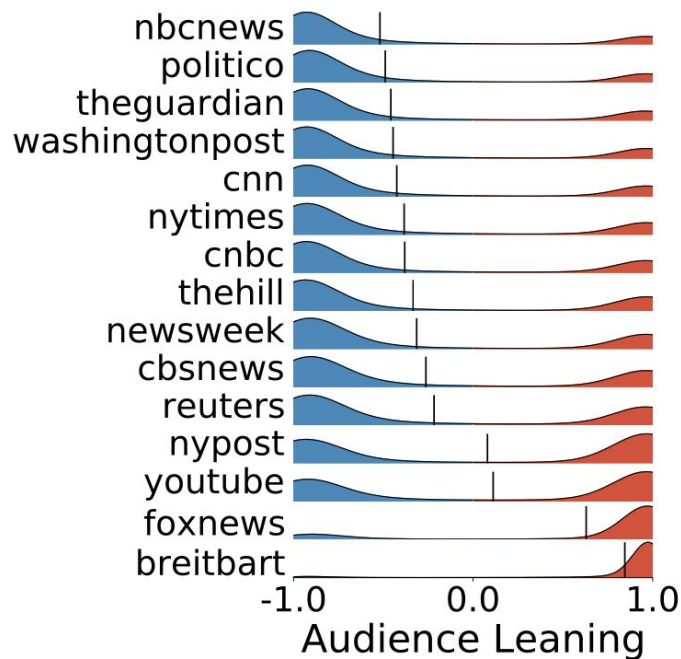

(a) Pew Research Center [12], $n=24$ (86%), $r = 0.94^{***}$ (b) Bakshy et al. [6], $n=281$ (65%), $r = 0.88^{***}$ (c) Budak et al. [9], $n=14$ (93%), $r = 0.83^{***}$

(d) AllSides [2], $n=237$ (81%), $\rho = 0.75^{***}$ (e) Robertson et al. [56], $n=3132$ (16%), $r = 0.63^{***}$ (f) Robertson et al. [56], $n=262$ (68%), $\rho = 0.46^{***}$

Shape of media readership: A media-centric view

CNN

FOX

BREITBART

Question

The shape of media readership in a global view

Data and method

1. A new COVID-19 Twitter dataset
2. Highly accurate geolocation parsing
3. Highly accurate user political leaning estimation

Contributions

1. A new set of media bias scores by audience leaning
2. Visuals of media readership in different countries
