RESEARCH SUMMARY

I aim to derive principles for responsible social systems, with my core expertise in large-scale quantitative analysis and collaboration with experts in social science, communication, and political science. I work towards my goal through a variety of methods – from curating unique social media datasets, to modeling collective user behavior, to building algorithmic audits for identifying negative platform effects, to designing and testing new HCI systems.

PROFESSIONAL EXPERIENCE

Research Fellow | University of Michigan.[^] Ann Arbor, MI, USA 2020.09 – present

[^] First 20 months working remotely as a research consultant due to pandemic and visa.

- Center for Social Media Responsibility. Adviser: Paul Resnick

Projects include (1) measuring cross-partisan discussions on YouTube; (2) characterizing concept difference and (3) quantifying the impacts of annotator demographics in labeling hate, offensive, and toxic social media content; (4) calibrating prevalence estimation methods for online problematic speech; (5) designing effective training procedure for crowdsourced labeling; (6) auditing polarized recommendations in YouTube recommender system.

Research Fellow | Australian National University. Canberra, ACT, Australia 2020.09 – 2021.03

- Computational Media Lab. Adviser: Lexing Xie

Projects include (1) measuring collective human attention across different social platforms; (2) picturing global media consumption during COVID-19.

Software Engineer | MicroStrategy, Inc. Hangzhou, Zhejiang, China 2015.09 – 2016.05

- Big Data Engine team. Built Apache Spark alike engine to process massive data.

Software Developer Intern | Baidu, Inc. Beijing, China 2014.12 – 2015.02

- Baidu Maps team. Developed a tool to collect realtime traffic status.
